

KNX Solutions

KNX Solutions,
Built for Integrators

Core provides KNX products and solutions designed to simplify integration, programming and project support across residential, hospitality and commercial applications.

Flexible integration.

Smarter programming.

Reliable performance.

One intelligent system, **Endless possibilities.**

KNX brings essential building functions together, enabling seamless control, greater comfort and flexible automation across residential, hospitality and commercial environments.

Lighting
Control lighting, adjust brightness and create personalised scenes.

Shading
Automate blinds and curtains for comfort, privacy and daylight.

Climate
Manage heating, cooling and room temperatures.

Security
Integrate compatible security systems for connected control.

Intercom
Communicate with visitors through integrated intercom systems.

Audio
Control audio across multiple rooms.

Scenes & Automation
Create personalised scenes that combine multiple home functions.

Remote Control
Manage supported functions remotely through the Core Mobile App.

A wider choice of **KNX-certified products**

Core offers an extensive range of KNX-certified products, giving integrators greater freedom to select, combine and configure the right solutions for different project requirements.

Extensive Product Range

Choose from a broad portfolio developed for different KNX functions and applications.

Flexible Configurations

Combine products and functions according to the technical requirements of each project.

Multiple Applications

Build solutions for residential, hospitality and commercial environments.

Wide Functionality

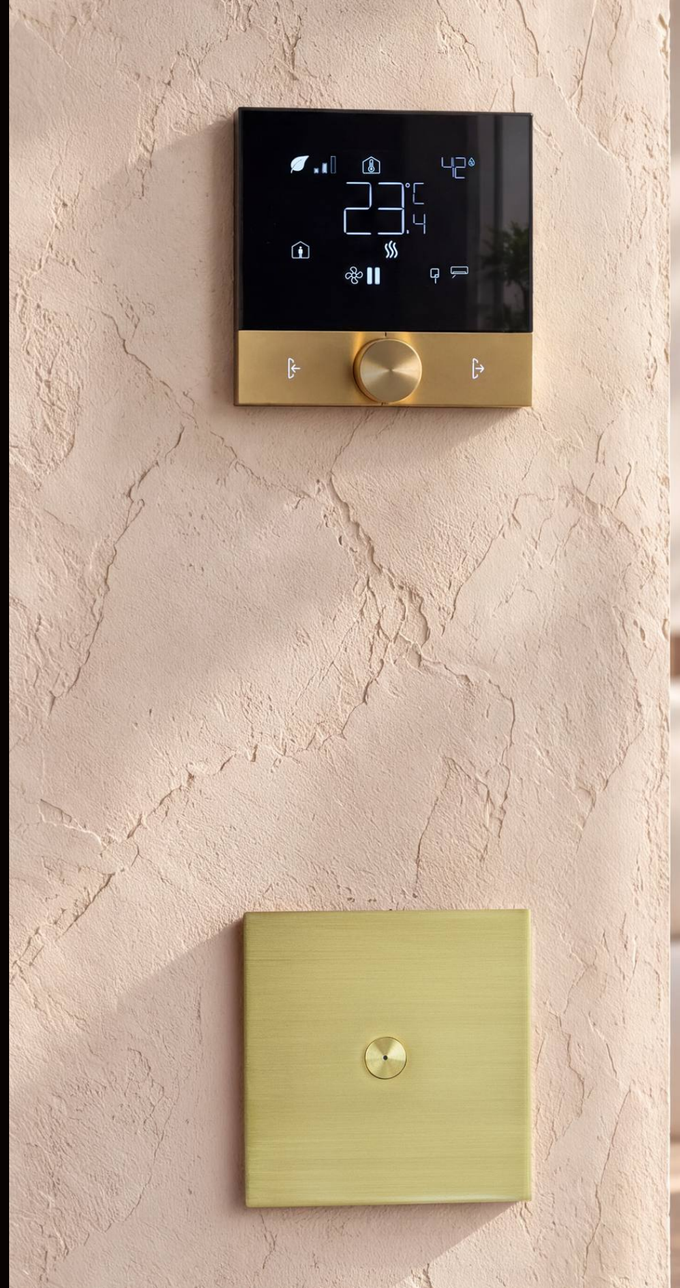

Cover different control and automation needs within the KNX ecosystem.

Design Options

Choose from different configurations, materials and finishes for visible control points.

Scalable Solutions

Build solutions for projects of different sizes and levels of complexity.

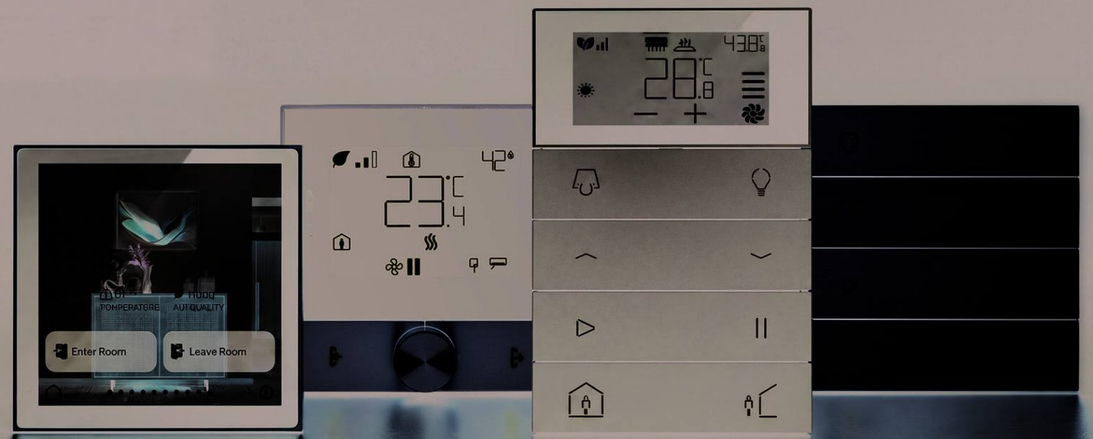

KNX User Interfaces

Eclipse Design Line

Where Elegance Meets Technology

The Eclipse Design Line combines bold aesthetics, clean geometry, and intuitive KNX control, creating the perfect balance between functionality and elegance.

Eclipse Design Line

- Eclipse Room Controller
- Eclipse Thermostat
- Eclipse Thermostatic Push Button
- Eclipse Push Button

Surface Design Line

Unified and Refined Identity

The Surface Design Line combines elegant lines, balanced proportions, and modular flexibility. Inspired by modern architecture, it offers customisable simplicity and refined aesthetics for contemporary living spaces.

Surface Design Line

- Surface Switch 2M
- Surface Switch 3M
- Surface Switch 4M
- Surface Switch 7M
- Surface GRMS Module

Core KNX-**AC Gateways**

Communication between air conditioner indoor units and KNX systems.

Easy ETS Configuration
Quick and simple setup using standard KNX ETS software.

Wide KNX Compatibility
Extensive KNX DPT support for compatibility with most KNX thermostats.

Complete AC Control
Control temperature, operating modes, fan speed and airflow direction.

Smart Thermostat Integration
Use the KNX thermostat's temperature sensor for AC control.

Error Log Reporting
Report AC error information directly to KNX systems.

Compact Design & Easy Installation
Space-saving design for quick installation inside AC units.

Secure & Reliable Connections
Magnetic mounting and industrial-grade connectors ensure safe, reliable installation.

DAIKIN SAMSUNG LG GREE MITSUBISHI ELECTRIC Haier

Work smarter.
Support projects from anywhere.

Core helps KNX professionals simplify project integration, programming and ongoing support, both on-site and remotely.

KNX Remote Programming

Access and program KNX installations remotely through CoreOS Touch Panels using ETS, helping reduce unnecessary site visits.

CoreOS Remote Control

Access and configure CoreOS Touch Panels remotely, making setup, adjustments and ongoing support easier without being on site.

Certified KNX Training Centre

Take your KNX expertise to the next level with professional, hands-on training at Core's certified KNX Training Centre. Gain practical knowledge and develop the skills to confidently design, program and commission KNX installations.

Official KNX Certification
Gain recognized KNX knowledge and credentials.

Expert-Led Training
Learn from experienced KNX professionals.

Hands-On Practice
Work with real equipment in a practical environment.

Real-World Project Scenarios
Apply your knowledge to real project requirements.

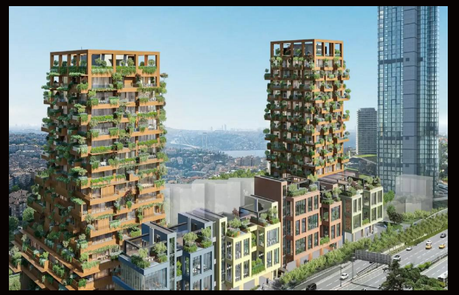

KNX integration, brought to life.
