Hospitality Solutions
for Smarter Hotel Rooms

Core combines KNX technology and intelligent room control to create connected hospitality solutions that enhance guest comfort and simplify hotel operations.

Designed for guest comfort. Built for seamless control.

Guest Room
Management System

Core's KNX-based guest room management system connects lighting, climate, shading and DND/MUR, enabling coordinated control and personalised room scenes.

Lighting
Create the right atmosphere for every moment of the guest stay.

Shading
Manage daylight, privacy and comfort with ease.

Climate
Give guests simple and intuitive control over their room temperature.

DND & MUR
Allow guests to communicate privacy and housekeeping requests directly from the room.

Scenes & Automation
Bring lighting, climate and shading together through coordinated room scenes.

Enhanced Guest Comfort.
Simplified Hotel Operations.

Core brings comfort, control, and efficiency together to enhance the guest experience, streamline hotel operations and optimise energy use.

Guest Comfort

Give guests intuitive control over lighting, temperature, and shading for a more personalised and comfortable stay.

Energy Efficiency

Optimise lighting and climate based on occupancy and room status to reduce unnecessary energy consumption.

Smart Hotel Operations

Simplify room management with connected controls and real-time room status, enabling faster responses and smoother daily operations.

Built on KNX for
Smarter Guest Rooms

KNX is an international open standard for home and building automation, enabling compatible devices from different manufacturers to work together. Core builds on KNX to deliver reliable, flexible, and scalable hotel room automation solutions.

Open Integration
Integrate compatible KNX devices from different manufacturers within one hotel infrastructure.

Reliable Performance
Built on the proven KNX standard for consistent and dependable room automation.

Flexible by Design
Adapt and expand room automation to meet changing hotel needs and project requirements.
